ABSTRACT

Two species of Naididae (subfamily Rhyacodrilinae and Limnodrilloidinae) and one species of Megascolidae were described from Sarawak coastal waters. The

Keywords: marine oligochaetes specimens identified as *Monophylephorus rubroniveus*, Clitellata, *Smithsonidrilus* sp. and *Pontodrilus litoralis*. All three species found in the present Oligochaeta, study are new records of marine oligochaetes from Sarawak coastal waters. The marine Naididae, finding of this study is expected to be useful as baseline information for future Megascolidae, ecological and systematic studies of marine oligochaetes in Malaysia. Sarawak, Borneo
